- 2 years of experience developing front-end web applications with JavaScript
- 1 year of experience developing Angular Single Page Applications
- Familiarity with Vue.JS and Vuex
- 2 years of experience developing full-stack applications
- 2 years of experience designing, building and consuming RESTful API's
- Angular Material, Bootstrap 4, Charts.JS

### AREAS OF EXPERTISE:

- Angular 8 and below
- JavaScript, TypeScript, ES6
- Redux / Flux state management
- React UI development
- GIT (Source Control)
- RESTful API web service development
- Angular SPA performance and optimization
- RxJS observables

## TECHNICAL PROFICIENCIES

---

Tools: VSCode, Postman, NgRx Devtools, NPM, Webpack, Angular CLI, GIT (Source Control)  
Servers: Node JS, MongoDB, Apache, MySQL  
Languages/ Libraries: JavaScript, TypeScript, Angular 8 and below, RxJS, NgRx Store, React / Redux, AngularJS, ExpressJS, JQuery, AJAX, JSON, CSS, LESS, SCSS, HTML5  
Recent Focus: Angular 8, Vue.JS / Vuex, React / Redux, Jasmine/Karma Integration Testing, Webpack

## PROFESSIONAL EXPERIENCE

---

### Front End Developer – KeyFocus (04/19–current)

KeyFocus is a scheduling application startup who is developing a web application that provides companies and professionals with tools for creating and managing meetings and events.

As a front end developer at KeyFocus I am responsible for:

- Planning, designing and developing Angular components, modules, services, and directives for the client-facing web application.
- Translating Adobe XD prototypes into responsive application pages.
- Organizing the application components by modularizing feature areas.

#### Key Achievements:

- Migrated RxJS Behavior Subject state management implementation to the NgRx Store pattern for managing application state globally.
- Migrated Bootstrap CSS and HTML components to Angular Material components, then integrated Bootstrap Grid, Reboot, and other required SCSS modules to facilitate Material & Bootstrap integration.

**Technologies:** Angular 7, TypeScript, RxJS, NgRx Redux, Angular Material, Bootstrap 4

#### Front End Developer – KeyFocus (04/19–current)

N.A Lehto is a transportation services startup that provides relocation services across North America.

As a Web Developer intern at N.A. Lehto, I was responsible for

- Integrating the Google Maps Software Development Kit and writing client-side logic responsible for calculating pricing for client jobs.
- Planning, designing and developing the server-side application using PHP 7 and MySQL for handling CRUD operations on the database.
- Developing responsive webpages from wireframe mockups using Bootstrap 4 CSS Framework.
- Planned, designed and developed the database schema, and relationships, then integrated with the PHP application.

**Technologies:** JavaScript, Google Maps SDK, Bootstrap 4, MySQL, PHP 7, AJAX, jQuery, DataTables

## EDUCATION & CREDENTIALS

---

**Bachelors of Applied Science, Information Technology, June 2018**

SPOKANE FALLS COMMUNITY COLLEGE, SPOKANE, WA
